SOLANA · ONE-MINUTE ROUNDS

minuttery

A shared-pot game settled on-chain, every 60 seconds.

minuttery.com · Running on Solana Devnet

HOW IT WORKS

Three steps to a winner

01

Pick a room

Choose a 0.1, 1, 2 or 5 SOL room. Rooms are public.

02

Enter in time

Each round lasts 60 seconds. Confirm your entry before second 55.

03

Winner on-chain

The protocol draws a winner and settles the pot on Solana.

ENTRY SIZES

Four rooms, one clock

0.1	1	2	5
SOL per entry	SOL per entry	SOL per entry	SOL per entry

Public rooms, a live countdown, player count and pot size, all on the same 60-second rhythm.

THE 60-SECOND CLOCK

Anatomy of a round

0s

Round opens

A new round starts in every room, every minute.

55s

Entries close

Confirm your entry before this mark.

60s

Round ends

The countdown ends and the winner is calculated.

85s

Settled

Target for the worker to settle the round on-chain.

⚠ Past 85 seconds without a settlement, players can claim a refund of every stake.

BUILT-IN SAFETY NET

If settlement fails, every stake comes back.

If the worker misses the settle window, players can claim the unsettled round. Every stake is refunded and the room rent returns to the opener.

GETTING IN

Passkey or wallet, your choice

Sign in

- ✓ Passkey login with Face ID, Touch ID or a device passkey
- ✓ Phantom, Solflare or Backpack on the web
- ✓ Mobile Wallet Adapter and Seed Vault on Android

Move SOL

0.11 SOL	Minimum deposit
~15 s	Typical deposit arrival
<0.01 SOL	Network fee

Withdraw to any Solana address.

SOCIAL BY DESIGN

Play together

Challenge links

Invite someone to a one-minute room. You both join the same pot and the same clock.

Share anywhere

Send invites through Telegram, Discord, a copied link or the Android share menu.

Round alerts

Telegram notifications keep you in the loop on every round.

ARCHITECTURE

One program, every client

Android app

Expo and React Native, with Mobile Wallet Adapter.

Desktop web

Browser wallets or passkey login.

Mobile web

The same game, straight from the browser.

Solana program · Anchor, Rust

One set of room accounts shared by every client, so players on different clients join the same round.

THE REPO

Under the hood

`apps/mobile`	Expo and React Native Android app
`apps/web`	Standalone web client
`services/workers`	Round settlement worker and results API
`programs/minuttery`	Anchor workspace for the Solana program

Apache-2.0 · TypeScript · Rust · Anchor · Expo

Devnet program `9Uf52hSPJPDqDj7QFqL5dKmdJseU1pRtzL8oNQGeDxrP`

STATUS

Where it stands

Now

- ✓ Live on Solana Devnet with test SOL
- ✓ Android, desktop web and mobile web share one program
- ✓ Open source under Apache-2.0

Next

- [Mainnet launch: date]
- [Security audit: status]
- [Public APK release: date]

TRY IT LIVE

Try a one-minute round.
